

SmallTalk

NOW YOU'RE TALKING!

Add voice communication to your respirator in seconds

- Speak to others without removing your mask
- Simple snap-on attachment
- Fit and remove in seconds
- Clear voice amplification through pocket-sized loudspeaker
- Rugged construction designed to withstand temperature, vibration, dust and impact
- Long-lasting standard 9V battery (alkaline or rechargeable)
- Thin, flexible cable — can be worn inside clothing

SmallTalk

NOW YOU'RE TALKING!

Introducing the new generation of SmallTalk: the in-mask amplifier that allows you to speak while wearing a respirator.

As you can talk with your mask fitted, you have no reason to remove it. That means 100% wear time. Also, there is **no damage to your respirator**, and cleaning is not affected.

No holes, no permanent attachments. SmallTalk simply snaps onto your existing exhalation valve.

SmallTalk runs on standard batteries and features a volume control and handy pocket clip.

It's loud. It's clear. It's small. And it's fitted to your mask before you can say 'Jack Robinson'!

If you know how to remove the valve cover of your mask, you'll know how to install SmallTalk. Make your voice heard in seconds.

S.E.A. full face masks

Sundström full face and half masks

Specifications
